Career and Technical Education

CTE Programs at RHS

Redmond High School offers students a variety of Career and Technical Education (CTE) programs to choose from. Examples of courses in the CTE programs at RHS include agriculture, animal science, marketing, woodworking, business management, construction technology, floral design, computer integrated manufacturing, automotive technology, welding, desktop digital design, small gas engines, and more!

Sign up for courses in:

Construction & Manufacturing Technology

Career possibilities in the Construction & Manufacturing Technology program include jobs that require constructing and processing of materials (such as woods, metals, and plastics) into final products. The career also involves related technical support activities such as production planning, maintenance and manufacturing/process engineering.
